# Plot 1: Monthly Sales Trends

This plot illustrates the sales trends over a calendar year. The data reveals a steady increase in sales as the year progresses, with notable peaks in April, August, and December. These peaks likely correlate with seasonal or holiday-related buying behaviors, highlighting key periods for marketing campaigns.

Plot 2: Product Category Distribution

Product Category Distribution
This pie chart demonstrates the distribution of sales percentages across various product categories. Electronics dominate with 30% of the total sales, followed by Clothing at 25%. Home Appliances, Books, and Toys account for smaller shares, with Toys contributing the least at 10%. The chart highlights the relative significance of each category in driving revenue.
